Course description:

Information Technology is combination of two words Information + Technology. Information is nothing that which informs, answer to question of some kind. But it is also that form through which data and knowledge can be derived as data represents value which is recognised by parameters, and knowledge that signifies understanding of real things while.

Technology is nothing but collection of techniques, skills, methods and processes used to produce output. It can be summarised in machines, computers, and devices. Now let's see what is Information Technology course brief.

Information technology is application of computers to store, retrieve, transmits and manipulate data of business or enterprise.

Basic Microbiology - Introduction

Microorganisms - Types - Bacteria, Archaea
Fungi
Algae
virus
parasites

synopsis:

Bacteria - Prokaryotes
Unicellular
lacks a membrane bound Nucleus

Archaea: lack peptidoglycan in cell wall
include Methanogens
Halophiles
Thermophiles

Fungi: unicellular yeast
Multi-cellular Molds
cell wall chitin

protozoa: unicellular, Eukaryotic microbes
move by pseudopods, cilia

Algae: photosynthetic Eukaryotes
reproduction - Sexually
Asexually

Virus: obligate intracellular parasites

parasites: proteinaceous infectious particle
Mad cow disease.

Course Name: Online Courses

Course date and duration: 01/02/2021 to 15/02/2021

Time 9 to 10

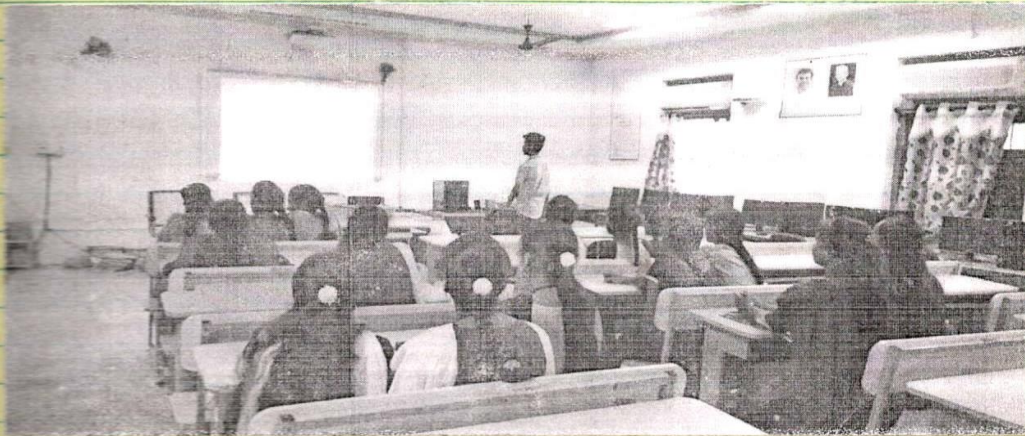

15 days

different online courses have different features:

some courses might stick tightly to a syllabus, others might let you pick up and take breaks from the class when your schedule allows. some might have "live" discussion groups scheduled over video conferencing at a certain time, others might simply record lectures and let you access the videos of them whenever you'd like (for more on self-paced online courses, see below)

self-paced online courses are online courses where you can study units, take tests / access lectures, and complete any course work on your own time - there is no fixed time scale
