ABOUT SEMINAR

The pace of advancements in the area of technology is rapid, dynamic and striving to impact every part of modern society and the Artificial Intelligence (AI) as a high value emerging technology currently attracts global attention. AI is a set of technologies that enable computers to perform a variety of advanced functions, including the ability to see, understand and translate spoken and written language, analyze data, make recommendations and more.

AI is a broad field that encompasses many different disciplines including computer science, data analytics and statistics, hardware and software engineering, linguistics, neuroscience and even philosophy and psychology.

India, being the most populous country, the fifth largest economy in terms of GDP and the second largest internet user base in the world with a rapidly growing tech talent pool, is witnessing a surge in AI research and development. The National Strategy for Artificial Intelligence launched in 2019 aims to make India a global leader in AI by 2030. The Indian govt.'s proactive stance and the active role of private sector in promoting AI have resulted in increased funding for research, the establishment of AI centres of excellence and the promotion of AI start ups in India. Thus AI is revolutionizing India's digital economy, improving services across sectors like banking, health and agriculture and offering personalized consumer experiences. It is estimated that the General Artificial Intelligence could boost India's GDP by \$359-438b by 2030 representing a 5.9-7.2 per cent increase.

Against this background, a ICSSR funded National Seminar on 'Artificial Intelligence' is being organized by the Department of Commerce. The main theme of the Seminar is to provide rich insights and better understanding of the concept of AI and its current trends to the participants representing from academia and industry.

SUB-THEMES:

- Evolution and need for Artificial Intelligence
- Role and contribution of AI in Indian economy
- AI interventions in the field of Research, Health, Education, Agriculture, Manufacturing transport, finance sectors
- Applications of AI in Robotics
- Artificial intelligence and cyber security and cyber crimes
- Effect of AI on employment and disemployment.
- Tools in AI
- Advantages and disadvantages of AI.
- Artificial intelligence and machine learning.
- Challenges and strategies associating with AI
- AI in present and future scenario.

ABOUT COLLEGE:

Smt. N.P.S. Govt. College for Women(A) is one of the premier higher learning institution catering to the educational needs for the women in Chittoor district in the Government sector. The institution has been established in 1982-83 with the sole aim of empowering women in all fields of national development and it is affiliated to Sri Venkateswara University, Tirupati. The college was accredited by the National Assessment and Accreditation Council (NAAC) with 'A' Grade. The college aims at achieving women empowerment by producing knowledgeable, competent, skilled, technical and resourceful women graduates and postgraduates in science, commerce, business and humanities streams. This is well equipped with infra structure, computer labs ,digital class rooms and our college as been identified as NRC in Chittoor. Accordingly, the college offers a 7 UG Programmes and 2 PG Programmes.. This college best practice is awarding 9 gold medals to the meritorious students every year donated by N.P.Venkateswara Chowdary EX.MLA founder of this college.

ABOUT DEPARTMENT:

The Department of Commerce, the single largest department in our college established in the year 1982-83 offering courses both graduate and post graduate programs with B.Com Computer Applications, B.Com General, Bachelor of Business Management and Master of Commerce. It is proud to say that all the faculty members are highly qualified and experienced. The department has also received recognition as a Research Center. Despite providing the students certificate courses, trainings to further enhance their academics and
